

# VAN BODY PRODUCTS

LTF | Tie Downs | Van Liners | Scuff Liners

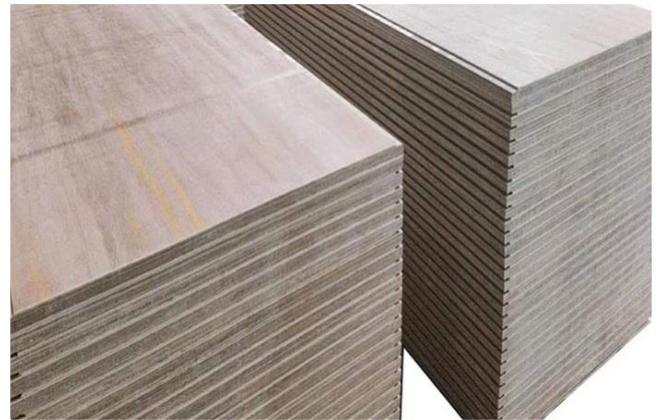

## LTF

Nova's Laminated Truck Flooring (LTF) is made with high-quality tropical hardwood, like Apitong. Our LTF offers exceptional durability and strength for demanding transportation needs. Engineered to withstand heavy loads and resist wear, ensuring longevity and reliability. Available in various thicknesses and widths, our LTF can be customized for any project, providing a seamless and secure surface for cargo. The lamination process enhances resistance to moisture and environmental factors, making it a superior choice for both dry and refrigerated trailers.

## VAN LINERS

Van Liners are essential for protecting your vehicle's interior from daily wear and tear, ensuring a professional appearance and extending the lifespan of your investment. Nova's liners shield the van's walls, floors, and ceilings from dents, scratches, and other damages caused by shifting cargo or equipment. Van liners also provide insulation against temperature variation.

## SCUFF LINERS & TIE DOWNS

Scuff liners and tie-downs are essential components for maintaining the integrity and functionality of your trailers interior. Scuff liners installed along the lower interior walls, act as a protective barrier against damage from shifting cargo. Complementing scuff liners, tie-downs secure loads during transit, preventing movement that could lead to damage or safety hazards. Nova provides durable scuff liner and tie-down options to extend the lifespan of your trailer and ensure the safe and secure transportation of goods.
